We have 4 main topics/groups:

- 1) Higher Teichmueller spaces → 4 people, ~4h
- 2) Lie theory (background) → 6 people, ~6h
- 3) Known notions of positivity (inclusive Lusztig) → 5 people, ~5h
- 4) Theta-positivity (inclusive classification) → 4 people, ~4h

On Friday: recap, summary, outlook, questions, exercises and discussion with Anna

Sum=19

- Want to distribute the topics
- Choose 2 and give priority (we assign so that we have a mixed level in each group) → end of March (then get in touch with your group and you have almost 4 months to prepare)
- We will send the other people in your group your mail address. If you do not want that, tell us.
- You are completely free how you use your hours; be aware that exercises and example are very helpful!!!!!!
